

InVite™

moth lure gel

Pheromones for Plodia, Ephestia, Indian Meal, Tobacco, Almond, Mediterranean Flour & Raisin Moths

InVite™ Moth Lure Gel contains pheromones blended in a unique gelled oil that protects the pheromone before release. The gel also provides a more uniform release over time, resulting in a product that is effective for up to 90 days. Easy to use, the gel is packed in a 12-dose mini-syringe with convenient dosage markings on the tube. One dose is dispensed on any glueboard of the shape and size desired. For high-volume trapping in dusty areas, InVite Moth

Lure Gel can be diluted with water and used in the Yellow Hanging PFT Station. For Discreet trapping in areas such as retail stores, the gel can be used in the D-Sect IPM Station.

Label and MSDS available at www.rockwelllabs.com.
