Orthene®
TURF, TREE & ORNAMENTAL 97 SPRAY
(Soluble Insecticide)

ACTIVE INGREDIENT: *Acephate. By Weight 97.4%
INERT INGREDIENTS: 2.6%
TOTAL: 100.0%

*O.S-Dimethyl acetylphosphoramidothioate
U.S. Patent. No. 6,013,272

PERSONAL PROTECTIVE EQUIPMENT (PPE)

CAUTION
Hazardous to Humans and Domestic Animals

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Acephate is an organophosphate, cholinesterase inhibitor.

FIRST AID

If swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If Inhaled:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

EMERGENCY INFORMATION

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

FOR THE FOLLOWING EMERGENCIES, PHONE 24 HOURS A DAY:
Transportation: CHEMTREC.................................................................1-800-424-9300
Other: AMVAC.................................................................1-800-424-9300

NOTE TO PHYSICIAN

This material contains a cholinesterase inhibitor. Measurement of blood cholinesterase activity may be useful in monitoring exposure but decisions regarding treatment will usually need to be made before test results are available. If signs of cholinesterase inhibition appear, atropine sulfate is antidotal, 2-PAM (PROTOPAM) is also antidotal and may be used in conjunction with atropine but should not be used alone.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Harmful if swallowed.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

MIXERS, LOADERS, APPLICATORS AND OTHER HANDLERS MUST WEAR:
• Long sleeved shirt and long pants, chemical-resistant gloves such as Butyl rubber ≥ 14 mils, Nitrile rubber ≥ 14 mils and Neoprene ≥ 14 mils and shoes plus socks.

In addition, all MIXERS and LOADERS and all APPLICATORS using low pressure hand wand application equipment must wear:
• A NIOSH-approved dust mist filtering respirator with MSHA/NIOSH approved number prefix TC-21C or a NIOSH-approved respirator with any N, R, P or HE filter. See Engineering Controls for additional requirements.

USER SAFETY RECOMMENDATION

Follow the manufacturer’s instructions for cleaning/maintaining PPE. If no instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. Cover or soil-incorporate spills.

INERT INGREDIENTS:

*Acephate. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 97.4%

TOTAL.................................................................100.0%

For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
• coveralls.
• chemical resistant gloves made of any waterproof material and
• shoes plus socks.
NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

Do not enter or allow others to enter until sprays have dried.

TANK MIXES
NOTICE: Tank mixing or use of this product with any other product which is not specifically and expressly authorized by the label shall be the exclusive risk of user, applicator and/or application advisor.

Read and follow the entire label of each product to be used in the tank mix with this product.

GENERAL USE PRECAUTIONS
• Do not graze treated areas.
• DO NOT HARVEST citrus for one year after treatment.
• For repeat applications, use a minimum spray interval of 3 days for application rates up to and including 1/2 lb/A and a minimum of 7 days for rates exceeding 1/2 lb/A.

NON-BEARING CITRUS

GENERAL INFORMATION
MIXING INSTRUCTIONS
Thoroughly clean all sprayer components prior to mixing. Add approximately 1/2 of the required amount of water to the spray tank and begin agitation. Add the required amount of ORTHENE Turf, Tree and Ornamental 97 Spray insecticide and mix thoroughly. Then add other tank mix partners or foliar feed additives and the remaining water. Maintain agitation during filling and spraying to ensure a uniform spray mixture.

For application equipment which has minimal agitation, such as tobacco transplant water equipment, proper attention to mixing the ORTHENE Turf, Tree and Ornamental 97 Spray product should be given. With tobacco transplant water applications, the ORTH -

TURF, TREE & ORNAMENTAL

97 SPRAY product should be premixed in water to form a slurry prior to putting the product into the transplant water applicator. If premixing is not done, then adequate time should be allowed for the product to dissolve in the transplant water prior to beginning application.

SPRAY DRIFT MANAGEMENT
A variety of factors including weather conditions, e.g., wind direction, wind speed, temperature, relative humidity and method of application, e.g., ground, aerial, airlift, chemigation can influence pesticide drift. The applicator and grower must evaluate all factors and make appropriate adjustments when applying this product.

• All aerial, ground and air-assisted/airblast application equipment must be properly maintained and calibrated using water as carrier. Do not apply this product as an ultralow (ULV) spray, or in any carrier other than water.
• Use the largest droplet size consistent with good pest control. Small droplets are more prone to spray drift and can be minimized by appropriate nozzle selection, by orienting nozzles away from the air stream as much as possible, and by avoiding excessive spray boom pressure.
• Do not apply at wind speeds greater than 10 mph at the application site.
• Make applications when wind velocity favors on-target product deposition (approximately 3 to 10 mph).
• Apply as close to target plants as practical to obtain a good spray pattern for adequate coverage.
• For aerial applications, do not apply at heights greater than 10 feet (consistent with height safety).
• For airblast applications, direct spray above foliage and turn off outward pointing nozzles at row ends and outer rows.
• For aerial applications, the spray boom should be mounted on the aircraft so as to minimize drift caused by wing tip vortices. The minimum practical boom length should be used and must not exceed 75% of wing span or rotor diameter.
• For ground applications, do not apply at heights greater than 4 feet.

PLANTS

PESTS CONTROLLED

AMOUNT ORTHENE TURF, TREE & ORNAMENTAL 97 SPRAY PER ACRE

TIME OF APPLICATION

FURTHER USE INSTRUCTIONS

Non-bearing Citrus (including citrus nursery seedlings). Aphid Grasshopper Katydid Mealybugs Orangedogs Plant Bugs (Lygus) Thrips Whiteflies

1/2 lb. (8 oz.)

The high rate should be used when a heavy infestation of Citrus Blackfly is present. Begin applications when eggs or adults first appear. Apply on a 7 to 10 day interval or as needed to maintain control.

Non-bearing Citrus (including citrus nursery seedlings) Ants (excluding carpenter, fire, harvester and pharaoh)* Foliar Spray 3/4 lb. (12 oz.)

Apply as needed for control of existing populations.

Drench Method:
Mix 3/4 oz. in 5 gals. of water. Apply 1 gal. of mix to each mound area by sprinkling the mound until it is wet and treat a four (4) foot diameter circle around the mound.

For best results apply the material in the early morning or late afternoon when the ants are most active.

Applications made under prolonged hot and dry conditions may be ineffective due to the location of the ants deep within the nest.

* Not registered in CA for control of Citrus Blackfly and Harvester Ants.
NURSERY STOCK
Non-Bearing Deciduous Fruit Trees, Nut Trees and Vines
In Nursery Fields or Non-Bearing Orchards

GENERAL USE PRECAUTIONS

- Do Not Allow Livestock To Graze Treated Areas.
- For application only to non-bearing trees and vines in nursery fields or in non-bearing orchards.
- Do not apply to interplants or single trees in a bearing orchard.
- Do not harvest any fruit from sprayed trees for one year after application.
- For repeat applications, use a minimum spray interval of 3 days for application rates up to and including 1/2 lb./A and a minimum of 7 days for rates exceeding 1/2 lb./A.

TURF (Non-Bearing Deciduous Fruit Trees, Nut Trees, Vines)

Do not use on Non-Crop Areas

CROP

Plants

Pests Controlled

Further Use Instructions

Container Grown Nursery Stock

Black Vine Weevil

(3/4 lb.

Application should be made by mid-September for greenhouse stock and by mid-October for outdoor stock. Consult your local county extension agent for information on the identification and control of root weevils on ornamentals.

Apply the specified amount of Orthene Turf, Tree & Ornamental 97 Spray per 100 gals. of solution so as to thoroughly drench the root system.

Orthene Turf, Tree & Ornamental 97 Spray

Application rate

TIME OF APPLICATION

Further Use Instructions

Trees and Shrubs (except Flowering Crabapple and Douglas Fir, See below)

Aphid Bagworm

1/4 to 1/2 lb.

As the insects begin to appear.

Apply the specified amount of Orthene Turf, Tree & Ornamental 97 Spray in 100 gals. water with a hydraulic sprayer. The addition of a suitable sticker improves control of Gypsy Moth larvae.

* Mist blow application: Adjust rates to 1 lb. per 100 gals. of water for Gypsy Moth control and 3/4 lb. per 100 gals. of water for Tent Caterpillar control. AMVAC does not advise application be made to Huckleberry, Balm of Gilead, Cottonwood, Lombardy Poplar and Viburnum suspensum as it may result in phytotoxicity in these plants.

Nursery crops: Before treating large plantings, spray only a few plants and observe two weeks for phytotoxicity.

**INDICATIONS OF INFECTION**
- Leafhopper: Yellowing of leaves, curled leaves, leafrolling, etc.
- Sod Webworm: White webbing on the soil surface, brown spots on leaves.
- Greenbug: Yellowing of leaves, curling of leaves, leafrolling, etc.
- Grasshopper: Yellowing of leaves, leafrolling, etc.
- Fall Armyworm: Yellowing of leaves, leafrolling, etc.
- Southern Armyworm: Yellowing of leaves, leafrolling, etc.
- Black Turfgrass Ataenius (except CA): Yellowing of leaves, leafrolling, etc.
- Spittlebug: Formation of spittle on leaves and stems.

**APPLICATION INSTRUCTIONS**
- Maximum amount of ORTHENE Turf, Tree & Ornamental 97 SPRAY per acre.
- Mix volumes: 1 to 15 gals. water per 1,000 sq. ft. Use 2 tsp. per gal. of water for small total mix volumes or 6 ft. oz. per 50 gals. of water for large total mix volumes.
- Do not irrigate after an irrigation.
- Do not mow turfgrass for at least 24 hours after application.
- Do not apply to turfgrass by air.
- Do not feed treated grass to livestock.
- Do not apply more than 3.1 lbs./A (3.0 lbs. ai/A) ORTHENE Turf, Tree & Ornamental 97 Spray to Sod Farm Turfgrass in a single application.
- User must allow at least 3 days between last application and harvesting of sod.

**REPEAT APPLICATIONS**
- As needed for adult populations.
- Repeat applications may be necessary for severe infestations.
- Do not repeat more than once per month.

**FURTHER USE INSTRUCTIONS**
- Apply as needed for adult populations (10 to 14 days).
- Repeat applications may be necessary.
- Do not repeat more than 1 week intervals.

**TURFGRASS**
- Greenbug (Schizaphis graminum) Grasshopper
- Leafhopper
- Mole Cricket (except CA)
- Sod Webworm (except CA)
- Spittlebug (except CA)

<tbody>
<tr>
<td>Floral Crops</td>
<td>Aphid</td>
<td>1/2 lb. (6 oz.)</td>
<td>As aphid begin to appear.</td>
<td>Apply the specified amount of Orthene Turf, Tree &amp; Ornamental 97 Spray in 100 gals. Water with a hydraulic sprayer as a full cover age spray. The addition of a wetting agent may be required on difficult to wet foliage. Caution: Phytotoxicity has occurred on the following foliage plants: Bletchum gibbum, Cis sus Antartica, Ficus triangularis, Fitzonia vomerifolia, Maranta leuconeura kerchovana, Pachystachya lutea, Plecanthus australis, Polyodium aureus, Polystichum, Psychotropa enifor mia, Ttoma menziesii. Before treating large plantings spray only a few plants and observe 2 weeks for varietal phytotoxicity. Application of Orthene Turf, Tree &amp; Ornamental Spray 97 on Poinsettias after bract formation may result in phytotoxicity on certain varieties.</td>
</tr>
<tr>
<td>Dahlias</td>
<td>Mealybug, Thrip</td>
<td>1/2 lb. (6 oz.)</td>
<td>As the insects begin to appear. A repeat application, at a 2 week interval, may be necessary for control of mealybugs and whiteflies.</td>
<td></td>
</tr>
<tr>
<td>Easter Lily</td>
<td>Scales (Crawlers)</td>
<td>1/2 lb. (6 oz.)</td>
<td>As crawlers begin to appear. Repeat applications, at a 2 week or more interval, may be necessary where there is continuous crawler production.</td>
<td></td>
</tr>
<tr>
<td>Gladiolus</td>
<td>Whitefly</td>
<td>1/4 lb. (4 oz.)</td>
<td>Apply when insects first appear. If a population is well established, make one application of the tank mix and follow 5 to 7 days later with TAME alone at 16 fl oz./100 gals. See TAME label for instructions. For sweetpotato whitefly control, apply the specified amount of Orthene Turf, Tree &amp; Ornamental 97 SPRAY plus TAME 2.4 EC Spray as a tank mix at a volume necessary to obtain good coverage. Follow the TAME label for specific instructions on the alternation of TAME plus Orthene and TAME alone and the rotation instructions to avoid potential resistance.</td>

### Pesticide Storage
Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

### Pesticide Disposal
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Open dumping is prohibited.

### Container Disposal
Completely empty container into application equipment. Do not reuse container. Dispose of empty container in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

### Limited Warranty and Disclaimer
The manufacturer warrants (a) that this product conforms to the chemical description on the label; (b) that this product is reasonably fit for the purposes set forth in directions for use, subject to the inherent risks referred to herein, when it is used in accordance with directions; and (c) that the directions, warnings, and other statements on this label are based upon responsible experts' evaluations of reasonable tests of effectiveness, of toxicity to laboratory animals and to plants and residues on food crops, and upon reports of field experience. Tests have not been made on all varieties of food crops and plants, or in all states or under all conditions.

There are no express warranties other than those set forth herein. To the extent consistent with applicable law, the manufacturer neither makes nor intends, nor does it authorize any agent or representative, to make any other warranties, express or implied, and it expressly excludes and disclaims all implied warranties of merchantability of fitness for a particular purpose, or any warranty of quality or performance. This warranty does not extend to, and the buyer shall be solely responsible for, any and all loss or damage which results from the use of this product in any manner which is inconsistent with the label directions, warnings or cautions.

### Pesticide Storage
Do not put concentrate or dilute into food or drink containers. Store in cool, dry place. Protect from excessive heat. Do not contaminate food or foodstuffs. Do not store or transport near feed or food.

For help with any spill, leak, fire or exposure involving this material, call day or night 1-323-264-3910.
